NOTES

1. GENERAL INFORMATION

The Company was incorporated in the Cayman Islands on 18 August 2004 as an exempted company with limited liability under the Companies Law of Cayman Islands. Pursuant to a corporate reorganisation (the “Corporate Reorganisation”) which was completed on 23 September 2006, in preparation for the listing of the shares of the Company on the Main Board of The Stock Exchange of Hong Kong Limited (the “Stock Exchange”), the Company acquired all of the equity interests in Best Truth Enterprises Limited, World Force Limited and Cyberbay Pte Ltd.. Details of the Corporate Reorganisation are set out in section 4 headed “Corporate Reorganisation” in Appendix V to the prospectus of the Company dated 29 September 2006 (the “Prospectus”).

The Company has issued 250,000,000 new shares pursuant to a public offer. The Company's shares were listed on the Stock Exchange on 16 October 2006.

2. BASIS OF PREPARATION

The condensed consolidated financial statements have been prepared in accordance with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on the Stock Exchange and with the Hong Kong Accounting Standard 34 “Interim Financial Reporting” issued by the Hong Kong Institute of Certified Public Accountants (the “HKICPA”).

The condensed consolidated financial statements have been prepared on consolidated basis as prescribed by the Accounting Guideline 5 “Merger Accounting for Common Control Combinations” issued by the HKICPA.

The condensed consolidated income statement, condensed consolidated cash flow statement and condensed consolidated statement of changes in equity for the six months ended 30 September 2006 include the results and cash flows of the companies now comprising the Group as if the current group structure had been in existence throughout the six months ended 30 September 2006, or since their respective dates of incorporation/establishment, where this is a shorter period. The condensed consolidated balance sheet of the Group as at 30 September 2006 have been prepared to present the assets and liabilities of the companies now comprising the Group as the current group structure resulting from the Corporate Reorganisation was completed on 23 September 2006.

The comparative figures for the six months ended 30 September 2005 and as at 31 March 2006 are presented on the same basis.

3. SIGNIFICANT ACCOUNTING POLICIES

The condensed consolidated financial statements have been prepared on the historical cost basis, as modified by the revaluation of available-for-sale financial assets and investment properties, which are carried at fair values. The accounting policies used in the condensed consolidated financial statements are consistent with those used in the preparation of the underlying financial statements of the Group for the three years ended 31 March 2006, as described in the accountants' report set out in Appendix I to the Prospectus.

In the current period, the Group has applied, for the first time, a number of new standards, amendments and interpretations issued by the HKICPA that are effective for accounting periods beginning on or after 1 December 2005 or 1 January 2006. The adoption of these new standards, amendments or interpretations had no material effect on how the results for the current or prior accounting periods are prepared and presented. Accordingly no prior period adjustment has been made.

The Group has not yet applied the following new or amended Hong Kong Financial Reporting Standards (“HKFRS(s)”), Hong Kong Accounting Standards (“HKAS(s)”) and Interpretations (“INT”) that have been issued but are not yet effective. The directors of the Company anticipate that the application of these standards, amendments or interpretations will have no material impact on the Group's results of operations and financial position.

MANAGEMENT DISCUSSION AND ANALYSIS**Financial Review**

The turnover of the Group for the six months ended 30 September 2006 amounted to HK\$467,073,000, representing an increase of 23% as compared to the corresponding period last year. The profit attributable to shareholders amounted to HK\$44,165,000, representing an increase of 13% as compared to the corresponding period last year. The basic earnings per share was HK5.9 cents.

During the results period, the gross profit margin was 32.3%, a slight increase from 32.0% of the corresponding period last year.

The profit margin after taxation was 9.5%, a slight decrease from 10.3% of the corresponding period last year, which was mainly attributable to an increase in the distribution costs. During the results period, the Group doubled its efforts in exploring both mainland and overseas markets while expanded the market coverage by establishing offices for sales and services in various locations in the northern and south western regions of the PRC and sped up in the development of overseas new markets, resulting in the increase of the size of the workforce, the staff salaries, the cost of visiting customers, traveling expenses and commissions, etc.

Business Review

The business of die-casting machines was the main source of revenue of the Group. During the period under review, the Group recorded an increase of 21% in the sales of die-casting machines as compared to the corresponding period last year.

The surge in the price of crude oil led to an increase in the price of plastic raw materials, therefore, the customers were prudent in making purchase of plastic injection moulding machines. Nevertheless, the sales of plastic injection moulding machines continued to increase by 33%, as compared to the corresponding period last year.

In order to enhance the performance in exports, a sales and services company was established in Michigan, USA to explore the North American market. During the period under review, exports sales accounted for 8% of the total sales, representing a growth of 104% from the corresponding period last year.

As for the new products, the Group is currently developing cold chamber die-casting machines with clamping force of 4,000 tons and plastic injection moulding machines with clamping force over 2,000 tons. Meanwhile, the research and development of direct clamp plastic injection moulding machines has also been completed. Function-wise, the Group has successfully developed the real-time control system for die-casting machines and the networking system (電腦連網管理系統) for plastic injection moulding machines to improve the customers’ operating efficiency. A number of new series of magnesium alloy die-casting machines has also been launched to cater for the market demand.

At the same time, a research and development office for CNC machines has been established by the Group in Taiwan to facilitate the research and development of such product. The Group also co-operates with a world-renowned CNC machines manufacturer in Germany, and acts as its distributor in the PRC.

Regarding the production, the operations of the new plant at Ningbo has commenced in phrases since June.

The Group’s principal raw materials in production are steel and cast. The price of steel remained high during the first half of the year but it began to fall from end of July. A downward trend was also seen in the price of cast, which is expected to alleviate the manufacturing cost.

Prospects

The Group is the largest manufacturer of die-casting machines in the PRC. The cold and hot chamber die-casting machines manufactured by the Group are used extensively in different sectors of the industries such as transport, building materials (lights, locks and bathing products), 3C products (communication products, computer products and consumer electronic products), electrical tools, toys, gifts and clothing. It is expected the demand on the Group’s die-casting machines will continue to grow.

Being the manufacturer of the first magnesium alloy die-casting machine as well as the first foreign enterprise selected to participate in technology-related project in the PRC, the Group has been actively involved in the scientific and technology project of the “National Tenth Five Year Plan” and has achieved breakthrough on the application and industrialization of magnesium, and become the showcase for magnesium alloy application and export, as a result, has boosted the rapid development of the magnesium alloy application in the PRC market. Given the superior performance of magnesium, which has been widely applied on various sectors namely automobiles, 3C products and hand tools, etc., has brought along vast opportunities for the future growth of the Group. With the National Development and Reform Commission and the Science & Technology Commission stating the inclusion of the magnesium alloy application into the key development plan during the “Eleventh Five Year Plan” period, it is expected that the prospect of magnesium alloy application in the PRC market will be promising.

The price of petroleum fell from the historical high of about US\$80/barrel in July 2006 to around US\$60/barrel recently. It is expected that the cost of plastic raw materials will decrease, the business of plastic injection moulding machines will be benefitted.

With the continuing upgrade of the manufacturing industry in the PRC, the market of CNC machines, commonly used by mould fabrication and machining industries, has been rapidly developing. Leveraging fully on the edge of sales and service networks in the PRC, the Group has accelerated the launch of the CNC machines so as to capture the market share of this new product and to become one of the growing business sectors of the Group in the future.

In order to remain competitive, the Group continued to enhance the research and development of new products. The new series of magnesium alloy die-casting machines, newly developed real-time control system for die-casting machines, direct clamp injection moulding machines and injection moulding machine networking system (電腦連網管理系統) are all well received in the market. As these kinds of new products offer a higher added-value, they will give a positive impact to the business of the Group.

Meanwhile, preliminary results have been achieved in the research and development of large-scaled die-casting machines, large-scaled plastic injection moulding machines and all electric injection moulding machines. It is expected the respective trial production will commence in 2007.

The Group has made incessant effort in enhancing staff training and offer appropriate incentive and remuneration packages with a view to establish an effective team spirit. With the endeavour of the staff, an ongoing development of the business is made possible.

In order to cater for the business growth in the next three to five years, a contract will be entered into in the near future with Kunshan Municipal Government of Jiangsu Province for the acquisition of a parcel of land with an area of 475.8 acres for a total consideration of approximately HK\$47,580,000, which will be funded from internal resources.

As for the overseas markets, the Group has stepped up its efforts in the development of new markets. The overseas markets sales is targeted to increase to 25% of the total sales of the Group in the next three years.

In respect of vertical and horizontal integration, the Group will continue to identify partners for collaboration so as to achieve cost saving and enhance the efficiency, with the ultimate purpose to make positive contribution to the Group.

The Group was listed on The Stock Exchange of Hong Kong Limited on 16 October 2006 and raised a net proceeds of HK\$252,500,000. Upon listing, the gearing ratio of the Group decreased to 44%. It also provides additional funds for development in different aspects, such as the expansion of plants, acquisition of additional production facilities, research and development, sales and promotion. It has also been used to repay part of the bank borrowings and the finance costs is expected to be reduced as a result.

Owing to the price fluctuation of the raw materials of zinc alloy and plastic raw material, the customers tend to be prudent in the purchase of machinery and equipment. Meanwhile, the government has recently refined the policy on tax rebate rates under export trade, together with the appreciation of RMB, increase in interest rate and the surge in labour cost, have created uncertainties to the businesses of customers. The competition in the plastic injection moulding machines market is relatively strong, posting certain level of pressure to the selling prices.

The business environment is full of challenges. However, the Group believes as the economy of the PRC continues to grow stronger, the demand for metal parts will continue to grow, and the demand for the die-casting machines which are capable of manufacturing metal parts of different shapes will grow accordingly. With the Group’s leading market position, strong brand recognition, strong research and development ability and economies of scale, enable the Group to provide its customers with quality products, value-added services and total solutions. Continuous efforts have also been made towards cost saving in order to enhance its competitiveness. Looking forward, the Group remains prudently optimistic about the operations in the second half of the year.

Liquidity and financial resources

The working capital of the Group was generally financed by internal cash flows generated from its operation and existing banking facilities. As at 30 September 2006, the Group's cash and bank balances amounted to approximately HK\$69.7 million (31 March 2006: HK\$65.4 million).

The gearing ratio (a ratio of total interest bearing liabilities to total equity) was approximately 81% (31 March 2006: 74%). The increase was mainly due to the increase in bank borrowings to HK\$388.7 million as at 30 September 2006 (31 March 2006: HK\$352.9 million) primarily for the purpose of financing the acquisition of production facilities during the period. Most of the new loans incepted in current period mature within one year.

Contingent liabilities

The Group provided guarantees to banks in respect of banking facilities granted to certain customers of the Group to purchase its products. As at 30 September 2006, the amount of the outstanding loans granted by banks to customers for which guarantees have been given by the Group amounted to approximately HK\$15,641,000 (31 March 2006: HK\$11,808,000).

Pledge of assets

- (i) The Group's banking facilities were secured by guarantees given by related parties and assets of the Group, including restricted bank balances, buildings, land use rights, investment properties, plant and machinery, furniture, fixtures and office equipment, with aggregate carrying amounts of HK\$180,777,000 (31 March 2006: HK\$123,670,000).
- (ii) As at 30 September 2006, the Group also has restricted bank balances to the extent of HK\$13,399,000 (31 March 2006: HK\$10,922,000) pledged to banks for credit facilities granted to customers to purchase the Group's products.
- (iii) The Group's investments in certain subsidiaries with aggregate net asset value of HK\$69,365,000 as at 30 September 2006 (31 March 2006: HK\$74,236,000) are pledged to a bank for banking facilities granted to the Group.

Capital commitments

As at 30 September 2006, the Group had made capital expenditure commitments of approximately HK\$17,186,000 (31 March 2006: HK\$13,525,000) in respect of acquisition of property, plant and equipment.

STAFF AND REMUNERATION POLICIES

As at 30 September 2006, the Group employed approximately 3,480 full time staff. The staff costs for current period amounted to HK\$69.6 million. The remuneration policies of the Group are determined based on market trends, future plans, and the performance of individuals. In addition, the Group also provides other staff benefit such as mandatory provident fund, state-managed social welfare scheme and share option schemes.
